## OTHERS TO BE TAKEN INTO ACCOUNT

### **SHIPMENTS TO THE CANARY ISLANDS:**

Weekly every Wednesday, except holidays.

Last truckload every Thursday, but with a limited capacity, since although it may end up being filled, its function is not to leave behind any of the goods delivered here on Tuesdays or Wednesdays.

To ensure that everything functions correctly, goods must be delivered to Victransa between Monday and Tuesday.

### **DELIVERIES TO THE CANARY ISLANDS:**

All goods will be delivered to the islands between Wednesday and Friday of the week following its delivery to Victransa. (I.e. deliveries are made in a week).

Foodstuff goods deliveries between the Monday and Tuesday following collection.

### **FUNCTIONING OF THE ROUTE:**

It is not considered as a marine service although a ship is used.

It travels by articulated lorry from its origin (Victransa) to Cadiz, where it arrives on Friday.

The lorry enters or embarks on the ferry on Saturday, and the latter arrives first thing on Monday at Sta. Cruz de Tenerife, where all the goods are distributed so that they can be delivered between the same Monday and Wednesday.

**\*IMPORTANT: AT THE MOMENT, APART FROM AIR TRANSPORT, THIS IS THE FASTEST SYSTEM FOR DELIVERING TO THE CANARY ISLANDS.**
